- Students acquired the knowledge about the historical development and functions of the museum and its significance

The Curriculum

Course Code: HIS-M-001-Introduction to Museology

Course Duration: Three Months (April to June, 2023)

Course Credit: 3

Museum is the storehouse of antique objects. Museology or museum-studies is the study of museum and their impact upon society. Museums care and conserve the above mentioned objects and display its collections for the common people. There is increased awareness about conservation of history and heritage in recent times and for that the demand for trained people in this field is also increasing simultaneously and also there is a growing need for professionals to look after them.

It is expected that the study of the course will be a little help to fulfil this growing need. The study of the course will create awareness amongst the students about heritage and its necessity to preserve them for posterity. It will also help the students for their further study in this discipline. The course is designed to explore the history of museums and their role in the society as well as the functions of the museums.

Learning Outcome: After the completion of the course the students will be able to

- learn the basics of museology
- identify museum concepts and functions

- explain the historical development of museums
- value the artefacts
- classify the artefacts
- learn necessity of preservation of heritage
