

## REPORT ON SOCIO-ECONOMIC SURVEY OF KUIYAPANI VILLAGE, MANGALDAI, DARRANG, ASSAM

A survey was conducted by the Department of Economics, Mangaldai College in January, 2023 to know status of socio-economic aspects of people living in Kuiyapani village, Pachim Mangaldai Bolck, Mangaldai, Darrang, Assam. The survey was done by the third semester students of Economics Department as a part of partial fulfilment of Skill Enhancement Course, namely, 'Data Collection and Presentation'. During the 1<sup>st</sup> week of January, 2023, Students visited different households of the village and collected data under the guidance and supervision of Dr Santosh Borkakati, HoD, Economics, Mangaldai College and Umesh Ch. Sarmah, Assistant Professor in Economics, Mangaldai College. Around 18 students have participated in the data collection process with a schedule and at the end they have successfully compiled the data and submitted it to the department.

### **Brief Summary of the Key Findings of the Survey:**

From the data it is observed that most of the working age population of the village took occupation as self-employed in business activities or daily wage earners followed by private jobs. Looking into some other important economic aspects it is found that though most of the households live in pucca house, yet a considerable number of households live in semi-pucca or kutcha houses. Those who have pucca house, most of them have availed the benefits under PM Awas Yojana. In the village majority of households use both firewood and LPG for cooking purposes and almost all the households have electricity connection in their residence. Bicycle is the common vehicle owned by almost every family and many of them have motorcycle whereas hardly two households own a car. The sex ratio of the village is 675 per 1000 males which is quite concerning. Coming to educational attainment, the participation of people in higher education is very low. Except one household, not a single member from all the households has done a postgraduation course. Majority of the people have attended lower primary school as their highest educational attainment. Another important finding of the survey is that hardly any member from the surveyed households have developed their skill under PM Kaushal Yojana.

### **Learning Outcomes:** Students have learnt

- 1) How to conduct survey
- 2) How to collect data
- 3) How to compile data
- 4) How to present data

A sample questionnaire has been attached below:
